Introduction

The District Improvement Plan (DIP) has been designed to provide schools and districts with a common planning template that addresses student learning and system needs that have been identified through the schools' Comprehensive Needs Assessment. It has also been designed to address any federal, state and locally required elements that must be contained in a School Improvement Plan.

Executive Summary

Introduction

Every school system has its own story to tell. The context in which teaching and learning takes place influences the processes and procedures by which the school system makes decisions around curriculum, instruction, and assessment. The context also impacts the way a school system stays faithful to its vision. Many factors contribute to the overall narrative such as an identification of stakeholders, a description of stakeholder engagement, the trends and issues affecting the school system, and the kinds of programs and services that a school system implements to support student learning.

The purpose of the Executive Summary (ES) is to provide a school system with an opportunity to describe in narrative form the strengths and challenges it encounters. By doing so, the public and members of the community will have a more complete picture of how the school system perceives itself and the process of self-reflection for continuous improvement. This summary is structured for the school system to reflect on how it provides teaching and learning on a day to day basis.

Description of the School System

Describe the school system's size, community/communities, location, and changes it has experienced in the last three years. Include demographic information about the students, staff, and community at large. What unique features and challenges are associated with the community/communities the school system serves?

Pontiac Academy for Excellence, a K-12 charter school district located in downtown Pontiac, an urban setting, spanning approximately 20 square miles in southeastern Michigan, opened its doors in 2000. Promising a better educational option for the students of the city, and living up to this promise, the school grew each year, as grade levels were added onto the school each year, until the 2006-2007 school year, when the academy graduated its first senior class. The K-12 school was divided into three separate schools, an elementary school, a middle school, and a high school, in the 2009-2010 school year. All three of these schools, as well as the district's central administrative office, are located on the same campus. Currently the district serves 985 students, including 301 students in the High School, 232 students in the Middle School, and 301 students in the Elementary School. Over the past 3 years, the district has seen several changes in leadership, both at the district and school levels, which have impacted all 3 schools in a variety of ways.

All 3 schools within the school district are school-wide Title I schools, with free lunches made available to 100% of students. Regarding demographics, Pontiac Academy for Excellence School District services a very diverse population of students and families. Currently, the student population is comprised of 67% African American, 25% Hispanic, 6% Caucasian, and 1% Asian students. 81% of the students of the district are economically disadvantaged (eligible for the schools' free and reduced price meals), 11% have been identified as students with disabilities, and 14% of the students are English Language Learners. Many of these statistics are similar to those reflective of the entire population of Pontiac. According to the most recent United States Census Bureau data (2014), 16.5% of the city's population are Hispanic or Latino, and 2.3% are Asian. However, 52.1% of the population of Pontiac are African American, 14.9% less than this same population at Pontiac Academy for Excellence, and the Caucasian population accounts for 34.4% of the city's population, which is 28.4% greater than this population in the school district. The United States Census Bureau also reports (2014) that the median household income in the city is \$28,825.00, and 34.2% of the population is living below the poverty level, which is aligned to the rate of students who have been identified as economically disadvantaged in the school district.

Due to the struggling economic status of the area, the district has experienced a high level of student transience. Staff turnover rates in all 3 schools have also increased significantly over the past several years.

System's Purpose

Provide the school system's purpose statement and ancillary content such as mission, vision, values, and/or beliefs. Describe how the school system embodies its purpose through its program offerings and expectations for students.

Mission Statement:

To provide students and families a safe, nurturing and challenging educational experience that will foster the strength of character necessary to succeed in career and life.

Vision Statement:

We envision a school district where students are champions of excellence in learning and life, and are supported by highly qualified administration and faculty, involved parents and an invested community, who show their dedication to educational success through their own high moral and professional standards.

Belief Statements:

We believe that all students will learn in an environment that educates the whole child, centered on the district's Pillars of Excellence and values, which include:

Safety: Ensuring that staff and students remain safe from all verbal, physical and emotional harm so that hearts and minds can be open to learning.

Respect: For each other, the rules and the educational process.

Learning: Choosing to put education first.

Community: Beyond the books, caring for and supporting each other.

Hard work: Expecting to achieve excellence equal only to the effort given.

Parent involvement: Encouraging and giving every opportunity for parents to be aware of and active in their child's educational experience.

Stability: Providing a structured, consistent environment that students and families can depend on.

Trust: Developing open, honest relationships between administration, teachers, parents and students.

Relationships: Being more than simply teachers; offering compassion, guidance and resources to students, their families and the entire community.

Responsibility: Owning up to mistakes and talking out conflict to elevate maturity and encourage growth.

Opportunity: Connecting our students and their families with a path toward a successful future, through academics and resources at OLHSA, a Community Action Agency.

Diversity: Honoring the special perspective that each unique life experience brings to education.

The school system embodies the mission and beliefs by employing a focus on the core content curriculum across all grade levels. School leaders are responsible for coordinating regular data study activities with their instructional staffs, using student achievement results that are current, identifying areas of weakness in each content area, and developing short-term action plans to address areas of deficiency. Staff members are expected to meet weekly to discuss critical issues as it relates to professional development, school improvement initiatives, and ongoing curriculum development and planning. Staff members are asked to participate in a number of supplemental learning activities that engage students, parents, and community members alike, including after-school tutoring, math night, literacy fair, science fair, Parent Empowerment Day, parent workshops, and the district open house.

Regarding expectations of students, students are expected to be in school each and every day, prepared to learn for the full day of school. Students in all 3 schools are expected to be in the uniform established by each building. Students are also expected to give their full effort at school each day to assure that the maximum level of opportunities can be made available to them upon leaving the school district. The staff holds high expectations of all students in the district. Students are expected to adhere to the district code of conduct, which will allow for optimal learning at the classroom level. Students experiencing difficulties with this expectation are provided with a multi-tiered system of support to address specific concerns.

Notable Achievements and Areas of Improvement

Describe the school system's notable achievements and areas of improvement in the last three years. Additionally, describe areas for improvement that the school system is striving to achieve in the next three years.

Over the next 3 years, each school would like to see continued gains in student achievement on the state assessments, meeting the goal statements identified by each school in their School Improvement Plans. In addition to seeing the Elementary and Middle School off of the Priority School status list. Each school's proficiency levels in all content areas on the state assessments are well below the state average, which is the mark that the schools of the district aspire to reach and exceed. Each school in the district has made the content areas of reading and math their highest priorities, and are currently planning research-based school improvement initiatives to address the performance of our students in these content areas. Through a common assessment instrument used across all grade levels, the schools will be able to accurately measure students' growth in the highest priority content areas of reading and math throughout each school year. Staff members will then be able to develop and implement educational plans that are truly individualized to meet the needs of all learners, that will support their continued progress in these content areas, which will lead to improved performance on the state assessments over time.

Additional Information

Provide any additional information you would like to share with the public and community that were not prompted in the previous sections.

While there have been a great number of leadership and staff changes at both the district and school levels over the past 3 years, the stakeholders of the Pontiac Academy for Excellence School District are fully committed to academic excellence, which includes holding high expectations of our staff, students, parents, and community members. The district is currently taking a number of steps to improve upon the culture and climate, programs, and procedures in all 3 schools. Keeping the goal of becoming a true district of excellence at the forefront, we will continue to make improvements throughout the district through collaboration with all stakeholders.

Improvement Plan Stakeholder Involvement

Introduction

The responses should be brief, descriptive, and appropriate for the specific section. It is recommended that the responses are written offline and then transferred into the sections below.

Improvement Planning Process

Improvement Planning Process

Describe the process used to engage a variety of stakeholders in the development of the institution's improvement plan. Include information on how stakeholders were selected and informed of their roles, and how meetings were scheduled to accommodate them.

The Pontiac Academy for Excellence District Improvement Team (DIT) meets regularly in order to develop, revise, update and monitor the District Improvement Plan and complete the District Process Rubrics. The DIT members include the principal from each school, District ESL Coordinator, District Special Education Coordinator, District School Improvement Director, District Parent Liaison and Superintendent. Each principal also chooses at least one staff member and student to serve on the DIT. In addition, the District Parent Liaison invites several parents throughout the district to participate on the DIT. The DIT also consists of k-12 subject-area vertical meetings. Stakeholders were informed of their roles and about upcoming meetings through emails, electronic meeting invitations and phone calls. Throughout the year, meetings were planned both during the morning and afternoon hours to accommodate schedules. Vertical department meetings were also used to gather information to drive the district improvement plan process. District Improvement information is provided to the PAE School Board members and Saginaw Valley State University (authorize).

Describe the representations from stakeholder groups that participated in the development of the improvement plan and their responsibilities in this process.

The District Improvement Team includes administrators, instructional staff, students and parents. Their responsibilities included reviewing student achievement data to develop gap statements, reviewing current district and school-level practices, brainstorming ideas to increase student achievement in core academic areas, reviewing research to determine plans of action for improvement, and reviewing the District Process Rubrics.

Explain how the final improvement plan was communicated to all stakeholders, and the method and frequency in which stakeholders receive information on its progress.

The final District Improvement Plan (DIP) will be communicated to stakeholders in the following ways:

- *emailed to all DIT team members
- *posted on district web-site
- *presented to school board
- *shared/discussed with principals
- *highlights reviewed during annual Title 1 parent meeting

Throughout the year, information on the progress of the DIP will be shared through the DIT meetings and through electronic (email) updates.

Plan Description

Goals Summary

The following is a summary of the goals encompassed in this plan. The details for each goal are available in the next section.

#	Goal Name	Goal Details	Goal Type	Total Funding
1	All students in Pontiac Academy for Excellence School District will increase their ability to understand and apply mathematical concepts.	Objectives: 2 Strategies: 6 Activities: 25	Academic	\$653473
2	All students in Pontiac Academy for Excellence School District will increase their reading proficiency across the content areas.	Objectives: 2 Strategies: 6 Activities: 27	Academic	\$724100
3	All students in Pontiac Academy for Excellence School District will apply knowledge of scientific concepts to increase their science proficiency.	Objectives: 2 Strategies: 5 Activities: 19	Academic	\$139000
4	All students in Pontiac Academy for Excellence School District will increase their proficiency in Social Studies.	Objectives: 2 Strategies: 5 Activities: 19	Academic	\$204000
5	Learning time for all students will be maximized.	Objectives: 1 Strategies: 8 Activities: 27	Organizational	\$389200
6	All students in Pontiac Academy for Excellence School District will become proficient writers.	Objectives: 1 Strategies: 2 Activities: 12	Academic	\$50400

Goal 1: All students in Pontiac Academy for Excellence School District will increase their ability to understand and apply mathematical concepts.

Measurable Objective 1:

100% of English Learners students will demonstrate a behavior of 1.3 year's worth of growth in Mathematics by 06/17/2016 as measured by NWEA.

Strategy 1:

ESL Extended Learning Time - ESL/Bilingual staff will provide extended learning opportunities to English Learners to supplement the general education and the alternative language programs.
